

TAKE YOUR VIDEO CONTENT GLOBAL WITH COMPREHENSIVE LINGUISTIC AND TECHNICAL SOLUTIONS FROM EVS TRANSLATIONS.

Voice-over and subtitling services

As the explosion of content on the Internet and social media has led to consumer fatigue, businesses look to video content to quickly capture dwindling attention-spans. EVS Translations has delivered comprehensive video solutions across 50+ languages to leading global brands for product commercials, customer testimonials and e-learning. We help businesses take their content further.

Choose from a selection of voiceover artist samples to find the one which is right for your business. Alternatively, you might choose subtitles to convey your brand message. Since many viewers will watch your content with the volume switched off, we can deliver both options so no one ever misses a word. Our in-house technical team can deliver audio-recordings in multiple languages for your voiceover and .SRT files for subtitles. But if you need a finished product that's ready to go, they will embed the content directly into the video. Then you're ready to launch.

All employees at EVS Translations are trained to understand the importance of data security and work in compliance with the EU General Data Protection Regulation.
