

TRANSLATION FOR VOICE-OVER OF VIDEOS, SUBTITLES, OR TRANSCRIPTIONS, AND STAND-ALONE PROCEDURES WITHOUT TRANSLATIONS ALSO AVAILABLE.

Voice-over and Subtitling Services

Creating videos for your business is a great project. As proven by social media, people are more receptive to and interested in video content than written posts, meaning they are more likely to watch and retain the information from your videos.

With its excellent Translation Technology team, EVS Translations is capable of providing you with professional voice overs for your videos, with or without translation. Our voice over talents can voice the text in its original language, or any other language you might request, while the same goes for any subtitling or transcription services you might request.

If you'd like to request subtitles, our team will transcribe the spoken words in the video and expertly time-stamp the subtitles so that they are displayed whenever the speaker opens their mouth. If you'd like these subtitles and transcription translated, one of our in-house native speaker translators will do so, after which they will also be added to the video. You may choose to have your video and subtitles returned with closed captions or open captions, depending on whether you want to be able to edit the subtitles later or prefer to have them look the same in every display format.

EVS Translations USA, Inc.

260 Peachtree Street NW, Suite 1801
Atlanta, GA 30303
